

Requirements for auditors of VPI European Rail Service GmbH for the technical assessment of workshops

1. Technical education in the area of metalworking, such as an engineer, technician, master or equivalent professional degrees
2. Practical experience in a repair workshop for wagons, as former employee, external quality assurance specialist or similar activity
3. At least 3 years professional experience in the application of maintenance guidelines for freight or tank wagons. Experience with the VPI-European Maintenance Guide (VPI-EMG) is preferred. This time can be reduced if training specially adapted to this activity is undertaken.
4. At least one successful participation in an education programme / training for welding procedures or non-destructive testing
5. Supervised participation in at least 3 complete technical assessments without compensation (before commencing work)
6. Participation in an auditor course, with successful completion as at least “internal auditor” as per DIN EN ISO 9001
7. Specific knowledge of the maintenance / refurbishing of wheelsets or brake systems is a plus

Note: Applicants may not be employees of repair workshops and may not reach retirement age within the next 12 months.
